My Profile

I am a recently graduated IT-Technologist with practical experience in C#/.NET development, SQL databases, and Azure-based environments. During my internship and academic projects, I worked on backend solutions with a strong focus on usability and data handling, ensuring functionality aligned with real-world business needs. I thrive in agile teams and bring hands-on experience with SCRUM, Jira, and Confluence. I am motivated by building robust cloud-based solutions that make a tangible difference, and I am eager to deepen my skills in microservices, DevOps practices, and modern cloud tools.

Work Experience

Intern - FOA, Vesterport

February 2025 - May 2025

- Developed a document generation tool in C#/.NET with a strong emphasis on usability and end-user experience; frontend built in TypeScript.
- Participated in agile workflows with SCRUM, including sprint planning, daily stand-ups, and backlog grooming in Jira.
- Created documentation in Confluence and collaborated closely with developers and consultants to deliver user-oriented, practical solutions.
- Gained insight into professional DevOps practices and structured team collaboration.
- Focused strongly on usability and frontend clarity, ensuring the solution supported consultants with intuitive workflows.

Team leader - The Burger Concept, Ballerup

November 2022 - June 2023

- Managed kitchen operations, trained new employees, and ensured high quality standards.
- Developed leadership, responsibility, and collaboration skills in a fast-paced environment.

Service Assistant (Driver) - Salling Group, Ishøj

January 2021 - September 2022

- Coordinated logistics and vehicle preparation.
- Ensured customer satisfaction and timely deliveries.

Service Assistant - Rema1000, Skovlunde

November 2018 - May 2020

- Provided customer service and cashier assistance.

Education

IT-Teknolog - Københavns Erhvervsakademi (KEA), Nørrebro

August 2023 - June 2025

Focus areas:

- Software development in C#, Python, JavaScript, C++.
- Frontend projects included building responsive dashboards and webapps with login and data visualization, tailored to specific user needs.
- SQL databases: modeling, setup, and query handling across multiple projects.
- Azure and cloud-based environments, networking, and data security.
- Agile teamwork using SCRUM methodology, Jira, and Confluence.
